

Ariel D. Walters

Product-Focused Software Engineer | Technical Writer | Engineering Leader

New Orleans, LA · arieldwalters4@gmail.com

SUMMARY

Product-oriented technologist with 10+ years of experience building and improving scalable systems, internal tools, and developer workflows. Known for translating complex technical problems into clear product strategy, documentation, and execution plans. Strong track record partnering with product, operations, and compliance to deliver high-impact solutions. Seeking immediate opportunities in software engineering, product-adjacent roles, or technical writing where clarity, ownership, and systems thinking matter.

CORE SKILLS

Product Thinking · Technical Writing & Documentation · Backend & Frontend Engineering · Internal Tools · Stakeholder Collaboration · Agile Delivery · REST APIs · System Design · Mentorship · Node.js · React · AWS

PROFESSIONAL EXPERIENCE

Software Engineer & Technical Consultant

Independent — Remote | 2020–Present - Partnered with startups and nonprofits to design, build, and ship web and mobile applications from discovery through launch. - Led product discovery sessions, clarified requirements, and translated business needs into technical architecture and delivery plans. - Authored clear technical documentation, handoffs, and onboarding guides to support long-term maintainability. - Mentored junior engineers through career transitions, bootcamps, and real-world project delivery.

Key Impact: Designed and delivered a client-facing visibility platform end-to-end (stakeholder interviews, feature specs, implementation, documentation), directly contributing to increased user adoption and organizational growth.

Senior Software Engineer

Eaze Technologies — Remote | 2020–2022 - Led improvements to inventory and operations tooling, reducing manual workflows by 80%+. - Contributed to internal ACH transaction platform (Adit), collaborating closely with product managers, operations, and compliance teams. - Produced reusable technical documentation and testing protocols adopted across multiple teams. - Became a trusted engineer for onboarding, async collaboration practices, and knowledge-sharing initiatives.

Key Impact: Delivered core features supporting multi-state expansion into Michigan; documentation standardized processes across three internal teams.

Software Engineer

Whetstone Education — New Orleans, LA | 2017–2018 - Built full-stack systems and analytics dashboards serving 140+ K-12 school districts. - Led development of the company's flagship "Super Dashboard," enabling large-scale district performance insights. - Supported hiring, sprint planning, and Agile process adoption.

Key Impact: Solely designed, built, and launched a feedback and analytics platform that supported a major company growth phase.

Software Engineer

BAE Systems — Fort Worth, TX | 2014–2016

The Boeing Company — Oklahoma City, OK | 2013–2014 - Built and maintained high-reliability software for defense and aerospace platforms. - Participated in change control boards, risk mitigation, and compliance-driven development environments.

EDUCATION

Executive MBA — Tulane University, 2020

B.S. Computer Engineering — Jackson State University, 2013

CAREER PAUSE

2022–2024, 2018–2020

Intentional career pauses following the birth of my children. During this time, I consulted for small businesses, mentored engineers, and deepened my focus on product thinking, documentation, and strategic communication.
